

Vessel Integrity Report

MRPL Sovereign AI Workbench | Generated: 2026-09-16 16:20 UTC

Executive Summary

Supported evidence is structured verbatim from verified sources. All documented findings and general requirements are distinguished with full provenance.

Documented Findings — integrity_log.md

- VESSEL-88: wall thickness measured at 14.2 mm. [1] (page 3)

Documented Scope & Verification Limitations

- Only facts explicitly stated in the listed source documents are presented.
- Parameters, conditions, or dates not explicitly present in the retrieved evidence are not documented.
- No speculative conclusions, unrecorded maintenance actions, or synthetic dates have been added.

Sources & Regulatory Evidence
