

Inspection Findings For V-2201 Report

MRPL Sovereign AI Workbench | Generated: 2026-09-14 22:22 UTC
Grounded: Yes • Confidence: 100.0% • Model: qwen2.5-1.5b-instruct

Equipment Name

V-2201 (Knockout Drum)

Documentation Specifications

- Design Pressure: 10.5 kg/cm²g
- Design Temperature: 120°C

Inspected During

- 03-Sep-2026

Inspector

S. Menon, Authorized Inspector

Record of Inspection

- 210 Each inspection and test performed on the process equipment shall be documented.
- The list of process equipment, components, instruments should be made for inclusion in the mechanical integrity or maintenance program.
- Records of trend analysis of machine and equipment should be taken into consideration.
- All maintenance procedures should be duly authorized.
- Inspection and Test Results:
- 210 Each inspection and test performed on the process equipment shall be
